

Title: Lean Six Sigma Made Easy An Unique Opportunity To

- **Build Your Capabilities & Resume**
- **Learn How to Perform Better on your Job**
 - **Get Six Sigma Certification,**
 - **Save Money, and**
- **Know New and Improved Way to Use Six Sigma**

Description: In the current economic climate, staying ahead of the curve has become very important for both individuals and businesses. It is also crucial that competitiveness is created with minimum expense.

As individuals, small and medium size business owners, and corporate managers, you are invited to learn everything about Six Sigma (Lean, DMAIC, and DFSS) and about how to use it to your advantage from someone who has successfully led these initiatives in most admired companies and has hands on experience in business management and turn around.

You will learn about Lean Six Sigma and Design for Six Sigma road maps, how does it help solve the problem, and enough exposure to tools that will help solve 80% of the problems. You will also be able know when to look for other tools and how to develop expertise in those.

Content: Introduction to Product and Process excellence, Change Management, Lean Six Sigma Roadmaps, Project Initiation, Measurement System, Root Cause Identification and Prioritization, Solution Development, Performance Measurement, Piloting, Process Control, and much more.

Who Should Participate: Individuals Interested in Improving their Competence at work and at home, Small and Medium Size Business Owners, Company Managers, and Future Leaders.

Duration: 8 Hours,

Certificate: Six Sigma Belt

BOTTOM LINE: You will walk out with an edge on competency, which is needed and used by most of the businesses around the world. You will move to the top of the list of employees who the company wants to retain even during the tough times.

Instructor's Profile: Dr. R.K. Pandey is a world-class authority in business and strategy with experience in Europe, North America, Asia, and Middle East. He has worked with most admired companies like GE, Siemens, and others to improve their business and product performances. He holds a PhD in Aerospace Engineering from Purdue University and lives in Florida, USA.
